

SUSTAINABILITY MENU

Sustainability has been in our DNA from the start. In order to harmonize our efforts and take the next step, we have identified four topics that we will focus on the coming years. This menu can be your one-stop-shop for the sustainability journey of your park. Each initiative contributes to at least one of the impact areas.

Enjoy your meal and ask, if you have any question!

Your Landal Sustainability team

ENERGY

One of our biggest impact is our energy consumption. We need to emit less CO₂ and play our part in stopping climate change. By switching from fossil to renewable sources of energy, reducing our energy demand and generating energy ourselves, we contribute to the Paris Climate Agreement.

BIODIVERSITY

Nature has been very good to us and therefore we need to be good for nature. Our parks are amidst of nature and part of who we are. By taking action at all our parks to not only accommodate guests, but animals, plants and insects too, we contribute to the resilience of our natural environment. Without nature, no Landal GreenParks, therefore we team up with mother nature!

EDUCATION

We did not inherit the world from our parents, we've just borrowed it from our children. By informing our guests, our employees, our partners and the children on our parks about the importance of sustainability, we foster lasting change for the future. We educate and provide an action perspective to everyone we interact with, so we can walk the talk together.

WASTE

We live on a finite world with finite resources and that means that we should think twice before throwing things away. In case we do throw things away, we need to make sure we retain as much value as possible. Therefore we need to try, together with our guests, maintenance departments and F&B outlets, to generate less waste and recycle it.

DESSERTS

OWL BOXES AND BIRD HOUSES

By placing boxes for owls and birdhouses you have a natural pest control service. For singing birds (oak) caterpillars are on the menu. Accommodating owls makes life tough for mice and rats. Besides cost savings, you can offer night safari (owls) or get free whistle concerts. That's what some extra biodiversity does for you!

- Reduce nuisance of mice and oak caterpillars
- Edutainment for our guests
- Improves biodiversity

Please contact your local supplier

From € 15 / piece

LOLL DESIGNS

This fully recycled chair by LOLL Design is not only eye-catching and comfortable, but also Cradle2Cradle certified. The chair is modular so you can easily assemble and disassemble it and replace parts. The chair is durable.

- Certified according to the Cradle2Cradle methodology (silver)
- Made from old PET bottles
- Wear-resistant, robust and easy to care for
- Low total cost of ownership

€ 400

FOODBANK / TOO GOOD TO GO (COMBINATION)

Battling food waste and offering a decent meal to those in need is something we love to contribute too. Reach out to your local Foodbank and request your guests to hand in products with long shelf lives as they leave.

Too Good To Go

Moreover, sell your surplus food via the simple solution Too Good To Go. Simply pack your delicious unsold goods into 'Magic Bags' and sell them through the Too Good To Go app. Reduce waste and engage with your local community at the same time.

- Battles food waste
- Improves margins
- Nice sustainability story
- Raising awareness
- Giving back to society no costs

Please contact us for further info via csikking@toogoodtogo.nl

STRAW BALE GARDEN

Gardening on straw has some advantages: you are independent of the substrate, because plants can grow independent from bad soils. Since the plants grow on the straw bales, weeds and soil-borne diseases have little chance. Bumblebees and wild bees, on the other hand, benefit from the straw, because they find a natural shelter.

- Strengthens Biodiversity
- Edutainment for our guests
- Nice sustainability story

SUSTAINABILITY MENU

STARTERS

INSECT HOTEL

With all their little holes and cracks, these hotels are the perfect place for ladybugs, spiders, bees and more. The hotel comes in different shapes and sizes. For a relatively low budget, you can offer a home to many different species. Moreover, these hotels can serve as input for the edutainment section.

- Natural enemies for mosquitos
- Nice sustainability story

Depending on size:
From **€ 200** / piece

(RENT A) BEE HIVE

By leasing one or more bee colonies, you actively support your immediate environment and the entire ecosystem and you ensure more biodiversity. You can sell the honey afterwards. We suggest to work together with a beekeeper or use the possibility to rent bees.

- Strengthens biodiversity
- Edutainment for our guests
- Sell locally sourced honey to guests.

Depending on country:
From **€ 140** / month

DEAD WOOD FENCE

Dead wood is one of the most vibrant habitats of our nature. Many insects, benefit from it, whether as food, hiding place or building material. These hedges are made of dead wood, which "work" as a fence or separation gives the park rustic farm garden charm and attracts many insects.

- Strengthens biodiversity
- Nice sustainability story
- Cost efficient
- Only requires leftover branches and some time

€ 0

WILD FLOWERS

Flower up your park and make the bees happy! Make sure to use native wild flower seeds strengthen the biodiversity of your region. Consult your greenkeeper or seed supplier for a good mix that suits your park. See the digital copy for an elaborative list of regional seeds. For German parks please check the list for available regional seeds.

- Reduce mowing costs
- Attracts pollinators and birds
- Nice sustainability story

Please contact your local gardener/supplier

Depending on country
From **€ 80**

CHARGING STATIONS

The percentage of guests arriving with an electric car is increasing, therefore the demand for charging stations is very likely to increase as well. By collaborating with our partner JustPluggin, we enable each park to install charging points. Depending on current (or expected) charging volumes, different financial & ownership models can be selected, making sure the charging solution fits your park and guest.

- Revenue generator
- Hospitable to electric cars
- Positive effect on energy mix
- ROI ~ 3 years

[Mail to department](#)

(Two charging points per station)

~ **€ 2.500**

SUSTAINABILITY EVENTS

Sustainability is a topic that has nested itself in civil society. Each year a wide range of activities is organized by even a larger variety of NGOs. We like to give you an overview of the main international activities so you can decide which activities to join.

- 26.03.2022 - Earth hour
- 20.05.2022 - World Bee Day
- 17.09.2022 - World Clean up day

[More info](#)

OZON WATER

Cleaning with Ozone was first done in 1906. It offers a lot of advantages, it is a natural way of cleaning without chemicals, but eliminates bacterias and viruses (99%). You need only the machine, tapwater and electricity to implement it.

- Eliminates negative impact of chemical usage
- Cost savings
- Less waste (packaging, deliveries)

HOW TO INFORM YOUR GUESTS (PARK COMMUNICATION)

Sustainability is something we do together with our guests. To inform our guests about and invite them to our journey, guest communication is available for most of the meals on the menu. Please contact the Sustainability team for more information via JIRA.

Please note that all displayed prices are educated estimates. No rights can be derived from any of the price quotes or claims mentioned on this menu.

MAINS

SOLARWOODLE

The SolarWoodle provides atmospheric lighting in the park. The SolarWoodle looks 'natural' due to the use of wood and is sustainable as it works entirely on solar energy and is wireless. This saves both energy costs and infrastructure.

- Solar powered
- Wireless, easy and quick to install
- High quality and long lifetime

[More info](#)

From **€ 250**

UV FILTERS FOR THE SWIMMING POOL

An ultraviolet (UV) pool system uses the power of UV light clean the pool water, lowering the chemical content in your pool and eliminating chlorine by-products. Using this makes your pool safer and easier to maintain. It also reduces the amount of fresh water needed. The UV filter has been installed at various Landal pools.

- Reduce water and chlorine use
- Improves the quality of the water
- Natural way of cleaning water
- ROI ~ 2-4 years*

[More info](#)

€ 17.500

BIODIGESTER 50-200

The biodigester takes swill waste and transforms it into BioGas. This can be used to cook or heat. Approximately each 3-4 kilo's of swill is digested into 1 Nm3 (capacity of 50 kg a day). Moreover, the biodigster generates plant fertilizer which can be used at the park or sold to guests and it offers educational guest content.

- Reduce gas, landscape & waste bills
- Sell degistate to guests
- Nice sustainability story
- ROI ~ 5-8 years

[More info](#)

€ 42.500 - € 87.500

SOLAR ENERGY

Capturing the energy of the sun come in two two main flavors, solar PV (generating electricity) and solar thermal (generating heat). Both options have different infrastructural and investment implications.

- Electrify & Sustainalize your park
- ROI ~ 7,8 years

Request info via JIRA

Prices on request

FRUIT GARDEN

By dedicating a small area of the park for a fruit garden one can arrange seasonal activities in which guests can discover what green can do. For example: bees in action, picking up fruit with children or cooking activities. The fruit forest will tell a educational story about the importance of biodiversity and the role of bees.

- Edutainment for our guests
- Improves biodiversity

Please contact your local gardener/supplier

20 Fruit trees, Bee flower mix, Trail & signs

Example ca. **€ 8.000**
